

EW Series Home Wall Mounted Ballet / Fitness Barre

Installation Instructions

Thank you for your purchase.

Typically, for ballet use the barre height is 42" from the floor to the top of the barre. For barre fitness the barre height is between 36" and 40" from the floor to the top of the barre. Of course, you can mount the barre to any height you desire.

First determine where you will mount your new barre making sure to attach the brackets to the wall studs. (see reverse side for recommended bracket spacing)

Mount wall brackets using the supplied 1/4" lag bolts and washers. If mounting to wood studs, pilot drill a 3/16" hole into the wall stud 1-3/4" deep prior to screwing in lag bolts. If mounting to a masonry wall, first install a 1/4 lag shield anchor (not included) prior to screwing in lag bolt.

If mounting to metal stud wall, it is highly recommended that a 1"X6" wood backer board first be mounted to the metal stud wall. **Be sure that the brackets are mounted level for proper installation.**

After brackets are securely mounted, push the black caps onto the exposed bolt heads for a finished look.

Mount the barre to the brackets by placing the barre into the bracket saddles with equal amounts of barre extending beyond each bracket.

Once you have the barre seated into the saddles, install the supplied # 8 X 3/4" screws through the holes in the bottom of the saddles and into the barre. It may be necessary to first drill a 1/16" pilot hole making sure not to drill all the way through the barre. 3/4" deep is recommended.

Note: Install both screws on each saddle and securely tighten.

The barre is ready to use as is and does not require a finish. However, if desired you can paint or stain the barre to suit.

Cleaning and maintenance: Simply wipe the brackets with a damp cloth to clean. As for cleaning the barre we suggest using Murphy's Oil Soap as directed.

DISCLAIMER: As with any fitness or exercise equipment, use of this equipment should only be used by persons who are physically able to use the equipment as it is designed for. Proper safety gear such as padded mats, shoes, clothing and the like should always be used. This equipment should not be used alone. Always have someone nearby in case of an emergency. Vita Vibe, Inc. and its affiliates will not be liable for any injury or death resulting from use of this equipment. User assumes responsibility for proper assembly, maintenance and use of this equipment.

Please keep this instruction sheet for future reference. Should you need assistance with assembly or replacement parts contact us directly. Do not return to place of purchase.
